SUMMARY

Experienced software developer with 1 year of expertise in Java and web development. Strong background in object-oriented programming and adept at collaborating in team environments. Skilled in software development, UI automation, and problem-solving.

IT SKILLS

java OOPS Springboot Hibernate
SQL UI Automation selenium
Angular HTML CSS RestAPI
problem solving DataStructure Algorithms

ACADEMIC PROFILE

Bachelor of Technology

RGPV University

📅 2018 - 2022 📍 Ujjain, MP
• MITM (CGPA-8.14)

Higher Secondary School

M.P. Board

📅 2018 📍 Dewas, MP
• Higher Secondary School (10+2) with 72%.

High School

M.P. Board

📅 2016 📍 Dewas, MP
• High School (10th) with 74%.

HOBBIES

playing chess playing carrom
cycling listening to music

INTERNSHIP

Java Developer/backend developer

Techno-Buddies Web Software Solutions

📅 Sep 2021 - Feb 2022 📍 Ujjain
• Project : Tech Blog

- I create a dynamic Java-based Tech Blog which serves as a foundation for advancing Java programming skills. The project centers around a Tech Blog platform, facilitating user interactions through functionalities like login, signup, and content creation. This endeavor equips learners with essential skills and tools.
- Skill Development: Acquiring good level skill in Java, Hibernate, SQL JDBC, JSP, HTML, CSS, and Bootstrap.

EXPERIENCE

Associate Software engineer

Harman a Samsung Company

📅 Mar 2022 - April 2023 📍 Pune
Project : Symphony Healthcare Solutions - Metys

- Engineered high-impact features, including diverse dashboards and medicine lists, contributing to comprehensive healthcare data management.
- Developed and optimized healthcare management system, enhancing efficiency and user experience through Java, SQL, Springboot, RestAPI, Angular, and Selenium.
- Demonstrated commitment to software quality by implementing JUnit tests and UI automation, ensuring reliability and meeting project deadlines.

PROJECT

Project title: Poll App

- Poll App is a comprehensive polling application where users can create polls and participate in voting. The app is designed to be intuitive and user-friendly, allowing anyone to create polls without needing an account. However, to vote on polls, users must register and log in.
- Java, Spring Boot, RESTful API, Angular, PostgreSQL, HTML, CSS, JavaScript, SDLC, Agile software development.
